## 1. Outline

This IC is the power management IC for GPS-PND/MID.

It integrates three high-efficiency step-down DCDC converters, seven low dropout regulators, power control logic, Li-ion Battery Charger, I2C-Bus Interface, voltage detections, thermal shut-down, and etc.

## 2. Feature

### ●System

- ✓ I2C-Bus interface @3.4MHz and 400kHz
- ✓ Detector Function (System/IO/Battery-Voltage-detector, UVLO)
- ✓ Thermal Shutdown Function
- ✓ Watchdog timer
- ✓ Power on key input for System's power up
- ✓ Power on reset output for CPU
- ✓ Flexible power-on/off sequence by OTP
- ✓ Flexible DCDCx and LDOx default-on/off control by OTP

### ●High Efficiency Step-down DC/DC Converters

- ✓ DC/DC1 0.6-3.5V Max 3000mA
- ✓ DC/DC2 0.6-3.5V Max 2000mA
- ✓ DC/DC3 0.6-3.5V Max 2000mA
- ✓ Soft-start circuit

### ●Low Drop Voltage Regulators

- ✓ LDO1 0.9-3.5V Max 300mA
- ✓ LDO2 0.9-3.5V Max 300mA
- ✓ LDO3 0.6-3.5V Max 300mA
- ✓ LDO4 0.9-3.5V Max 200mA
- ✓ LDO5 0.9-3.5V Max 200mA
- ✓ LDORTC1 1.7-3.5V Max 10mA (AlwaysOn, For coin battery)
- ✓ LDORTC2 0.9-3.5V Max 10mA (AlwaysOn)
- ✓ Over current Protection and Short circuit Protection.

### ●Li-ion Battery Charger

- ✓ Supports AC adapter charging and USB charging in an individual port
- ✓ With the current limit protection and charge current control.
- ✓ The system can power on even when Li-ion Battery is low voltage or open.
- ✓ Rapid timer and Trickle timer.
- ✓ Power-path control.
- ✓ Over temperature protection

### ●Fuel Gauge

- ✓ 12-bit resolution.
- ✓ 1 second integration.

### ●ADC

- ✓ 12-bit resolution A/D converter
- ✓ Eight channels: LIMMON, VADP, VUSB, VBAT, VSYS, THERMBAT and two external(GPIO) pins.
- ✓ Single/Auto conversion mode
- ✓ Detect high/low thresholds which can be set

### ●4ch-GPIO

- ✓ Supports interrupt function (level/edge) for input signals
- ✓ Outputs power-on signal for external devices
- ✓ Power on/off input for System's power up/down
- ✓ DCDCx and LDOx can be controlled by external input
- ✓ GPIO2 can output LDORTC2
- ✓ GPIO0 and GPIO1 have input to ADC for voltage monitor
- ✓ GPIO0 and GPIO1 have maximum 15mA sink for LED.

### ●Interrupt Controller (INTC)

- Package QFN0606-48(0.4mm pitch)
- Process CMOS

### 3. Block Diagram

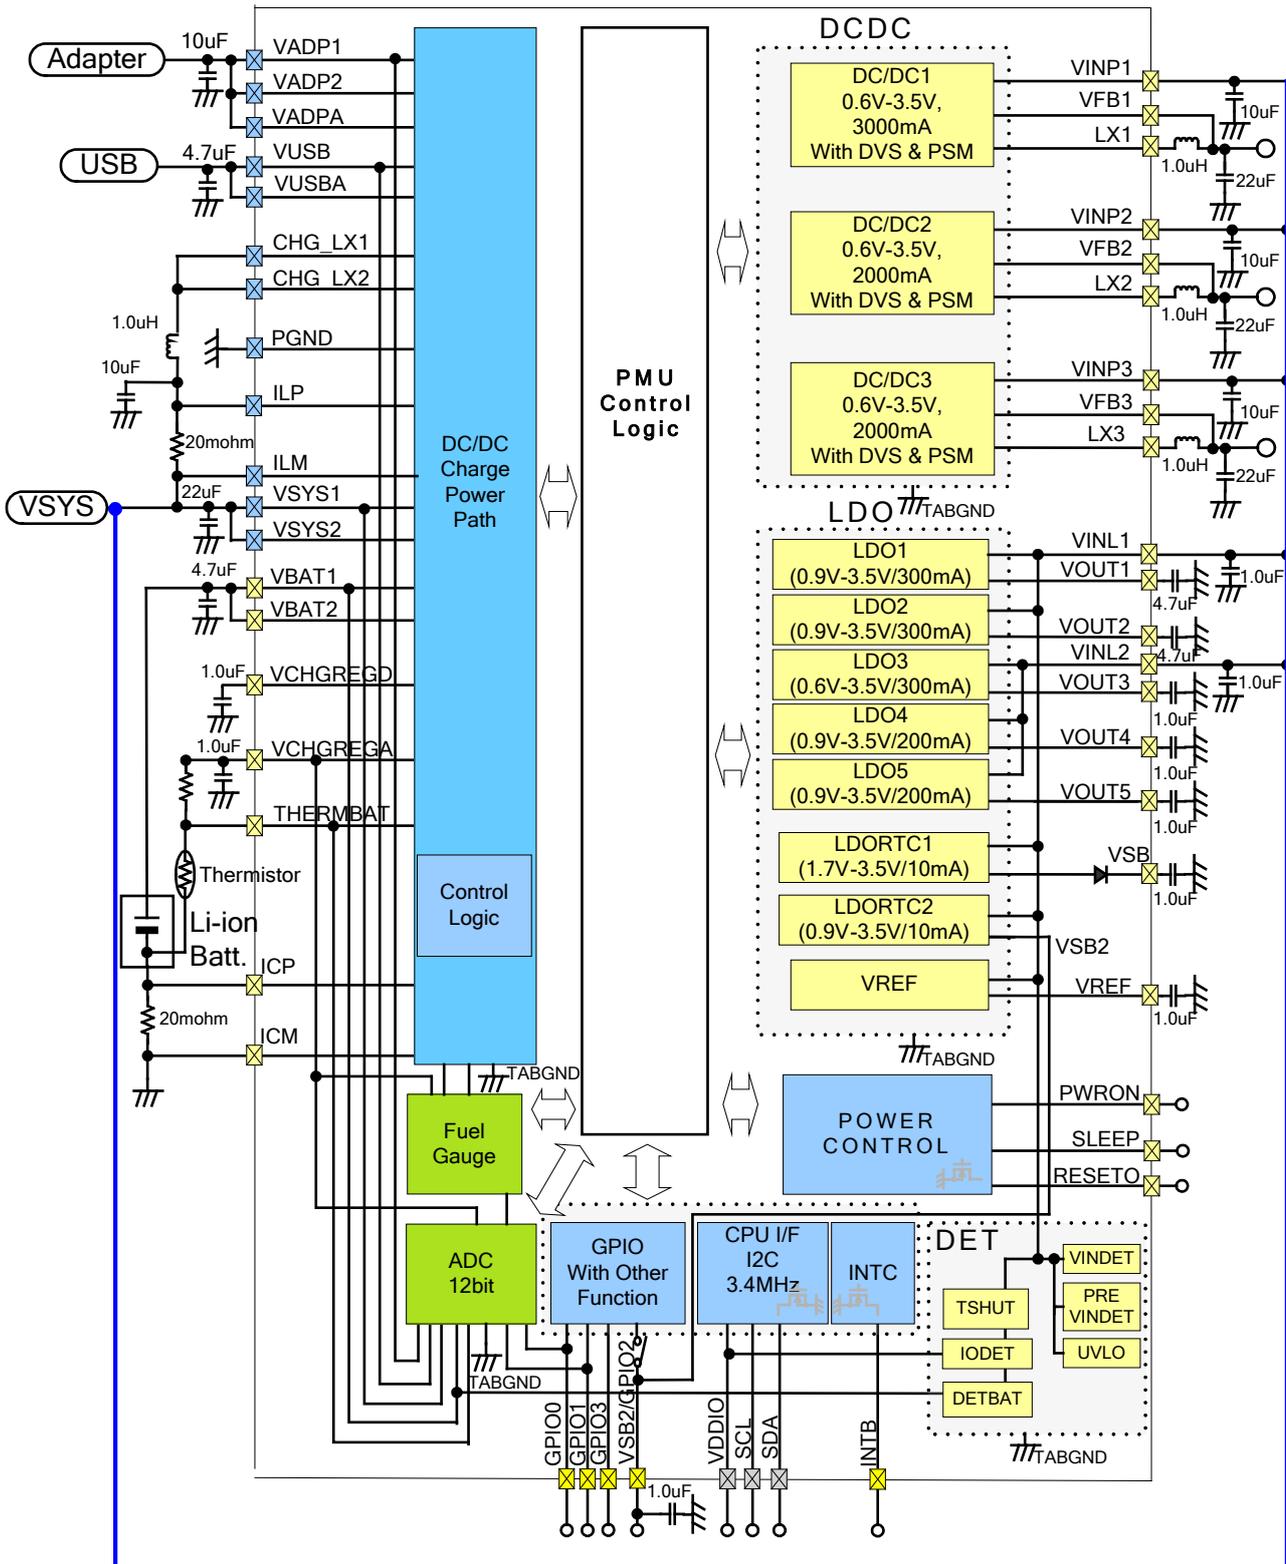

Fig 3-1 Block Diagram

## 4. Electrical Characteristics

### 4.1 Absolute Maximum Ratings

Exposure to the condition exceeded absolute maximum ratings may cause the permanent damages and affect the reliability and safety of both device and systems using the device. The functional operations cannot be guaranteed beyond specified values in the recommended conditions.

Symbol	Parameter	Condition	Min	Max	Units
V <sub>PS1</sub>	Power Supply Voltage 1	VADP*, VUSB* pin	-0.3	7.0	V
V <sub>PS2</sub>	Power Supply Voltage 2	VINP1-3, VINL1-2, VSYS1-2, VBAT1-2 pin	-0.3	6.0	V
V <sub>PS3</sub>	Power Supply Voltage 3	VDDIO pin	-0.3	4.5	V
V <sub>INPUT</sub>	Input Voltage Range	PWRON, RESET0, INTB, SLEEP pin	-0.3	VSYS + 0.3	V
		SDA, SCL pin	-0.3	VDDIO + 0.3	V
		GPIO0-1 pin	-0.3	VSYS + 0.3 / VDDIO + 0.3	V
		GPIO2-3 pin	-0.3	VSYS + 0.3	V
		AIN0-1(GPIO0-1) pin	-0.3	2.8	V
T <sub>stg</sub>	Storage Temperature	-	-55	125	degrees C
PD	Package Allowable Dissipation	T <sub>a</sub> = 25 degrees C	0	4500	mW

Table 4-1 Absolute Maximum Ratings

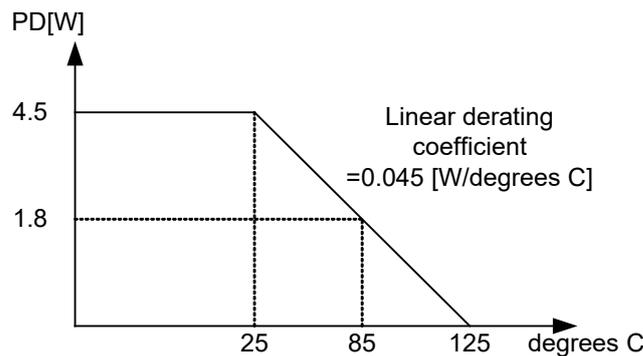

Fig 4-1 Maximum Package Allowable Dissipation

**4.2 Recommendation of Operating Conditions**

Symbol	Parameter	Condition	Min	Typ	Max	Units
VADP	Power Supply Voltage	VADP* pin	4.5	5.0	5.5	V
VUSB	Power Supply Voltage	VUSB* pin	4.5	5.0	5.5	V
VSYS	Power Supply Voltage	VINP1-3, VINL1 VSYS1-2, VBAT1-2 pin	2.7	3.6	5.5	V
VINL2	Power Supply Voltage	VINL2	1.7	3.6	5.5	V
VDDIO	Power Supply Voltage	VDDIO pin (VSYS > VDDIO)	1.7	1.8	3.4	V
*GND*	Ground	GND		0		V
Ta	Temperature of Operation	-	-40		85	degrees C

Table 4-2 Recommendation of Operating Conditions

### 4.3 I/O Electrical Characteristics

Symbol	Parameter	Condition	Min	Typ	Max	Units
<i>VSYS NMOS Input Pin: PWRON, SLEEP, GPIO0, GPIO1, GPIO2, GPIO3</i>						
VIL	Low level input voltage				0.4	V
VIH	High level input voltage		1.4		VSYS	V
<i>VSYS Nch Open Drain output Pin : RESET0</i>						
VOL	Low level output voltage	Iout = 2mA			0.4	V
Vto	Tolerant				VSYS	V
<i>VSYS CMOS input/output Pin : GPIO0, GPIO1, GPIO2, GPIO3</i>						
VIL	Low level input voltage				VSYS*0.2	V
VIH	High level input voltage		VSYS*0.8		VSYS	V
VOL	Low level output voltage	Iout = 4mA			0.4	V
VOH	High level output voltage	Iout = -4mA	VSYS-0.4			V
<i>VSYS Nch Open Drain output Pin : INTB, GPIO0, GPIO1, GPIO2, GPIO3</i>						
VOL	Low level output voltage	Iout = 4mA			0.4	V
Vto	Tolerant				VSYS	V
<i>VSYS Nch Open Drain output Pin: GPIO0, GPIO1(for LED)</i>						
VOL	Low level output voltage	Iout = 15mA			0.4	V
Vto	Tolerant				VSYS	V

Symbol	Parameter	Condition	Min	Typ	Max	Units
<i>VDDIO CMOS input Pin (Schmitt Input): SCL</i>						
VIL	Low level input voltage				VDDIO*0.3	V
VIH	High level input voltage		VDDIO*0.7		3.4	V
$\Delta V_I$	Hysteresis		VDDIO*0.1			V
<i>VDDIO CMOS input/output Pin(Schmitt Input / Nch Open Drain output) : SDA</i>						
VIL	Low level input voltage				VDDIO*0.3	V
VIH	High level input voltage		VDDIO*0.7		3.4	V
$\Delta V_I$	Hysteresis		VDDIO*0.1			V
VOL	Low level output voltage	Iout = 3mA			0.4	V
<i>VDDIO CMOS input/output Pin : GPIO0, GPIO1</i>						
VIL	Low level input voltage				VDDIO*0.2	V
VIH	High level input voltage		VDDIO*0.8		VDDIO	V
VOL	Low level output voltage	Iout = 4mA			0.4	V
VOH	High level output voltage	Iout = -4mA	VDDIO-0.4			V

Table 4-3 I/O Electrical Characteristics

## 4.4 Consumption Current

Operating Conditions (unless otherwise specified) Ta = 25 degrees C, VIN =3.6V, No-load

Symbol	Parameter	Condition	Min	Typ	Max	Units
I <sub>ST</sub>	Standby current	PowerOff (Note*1)		13		μA
I <sub>OP</sub>	Operating current	PowerOn (Note*1)		380		μA
I <sub>SLP</sub>	Sleep current	Sleep (Note*1)		132		μA

Table 4-4 Consumption Current

Note\*1) Each condition is below (Not include the current of thermistor)

	PowerOFF	PowerON	Sleep

46	VINP2	Power supply for DC/DC2	-	P				
47	VINP3	Power supply for DC/DC3	-	P				
48	LX3	DC/DC3 switch output	O	A				

Note\*1: I: Input, O: Output

Note\*2: A: Analog, D: Digital, P: Power, G: Ground

Note\*3: Reset State: RESETO=Low.

Note\*4: Vinmax: Maximum input voltage

Note\*5: GP00-GP03: "Input" or "Output" is selectable by OTP. Input/Output type (CMOS or NMOS or Analog or Nch Open Drain Output) is selectable by OTP. Refer to the chapter of GPIO for detail.

Table 6-1 Pin Description

## 7. Power Control

This PMU has the power-on/off sequence that can be flexibly set by OTP. The default on/off, timing, and voltage of DCDCx and LDOx are programmable. In addition, GPIO0-GPIO3 pins output the power-on/off signal to external LDO/DCDC by the setting of OTP.

## 8. Regulators

### 8.1 Regulators Table

Symbol	DCDC1	DCDC2	DCDC3	
Initial Output Voltage	0.6-3.5V	0.6-3.5V	0.6-3.5V	
Maximum Output Current	3000mA	2000mA	2000mA	
External Inductor	1.0 $\mu$ H	1.0 $\mu$ H	1.0 $\mu$ H	
External Capacitor	22 $\mu$ F	22 $\mu$ F	22 $\mu$ F	
Output Control	I2C	I2C	I2C	

Table 8-1 Regulator Table (DC/DC)

Symbol	LDO1	LDO2	LDO3	LDO4
Initial Output Voltage	0.9-3.5V	0.9-3.5V	0.6-3.5V	0.9-3.5V
Maximum Output Current	300mA	300mA	300mA	200mA
External Capacitor	4.7 $\mu$ F	4.7 $\mu$ F	1 $\mu$ F	1 $\mu$ F
Output Control	I2C	I2C	I2C	I2C

Symbol	LDO5	LDORTC1	LDORTC2	
Initial Output Voltage	0.9-3.5V	1.7-3.5V	0.9-3.5V	
Maximum Output Current	200mA	10mA	10mA	
External Capacitor	1 $\mu$ F	1 $\mu$ F	1 $\mu$ F	
Output Control	I2C	Always-On/I2C	Always-On/I2C	

Table 8-2 Regulator Table (LDO)

## 9. Li-ion Battery Charger

This PMU integrates Li-ion battery charger with the power path control and supports the following functions.

- ✓ Two external power input ports. (VADP port for AC adapter, VUSB port for USB bus power)
- ✓ The charging current limit setting for the battery. (max 1.8A)
- ✓ The output current limit setting for system load. (max 2.5A for AC adapter input)
- ✓ Integrated MOSFET of battery side. (No external MOSFET required.)
- ✓ The full charging voltage setting for the various batteries. (from 4.05V to 4.35V)

The thermistor monitor for voltage control compliant with JEITA.

### 9.1 Li-ion Battery Charger Block Diagram

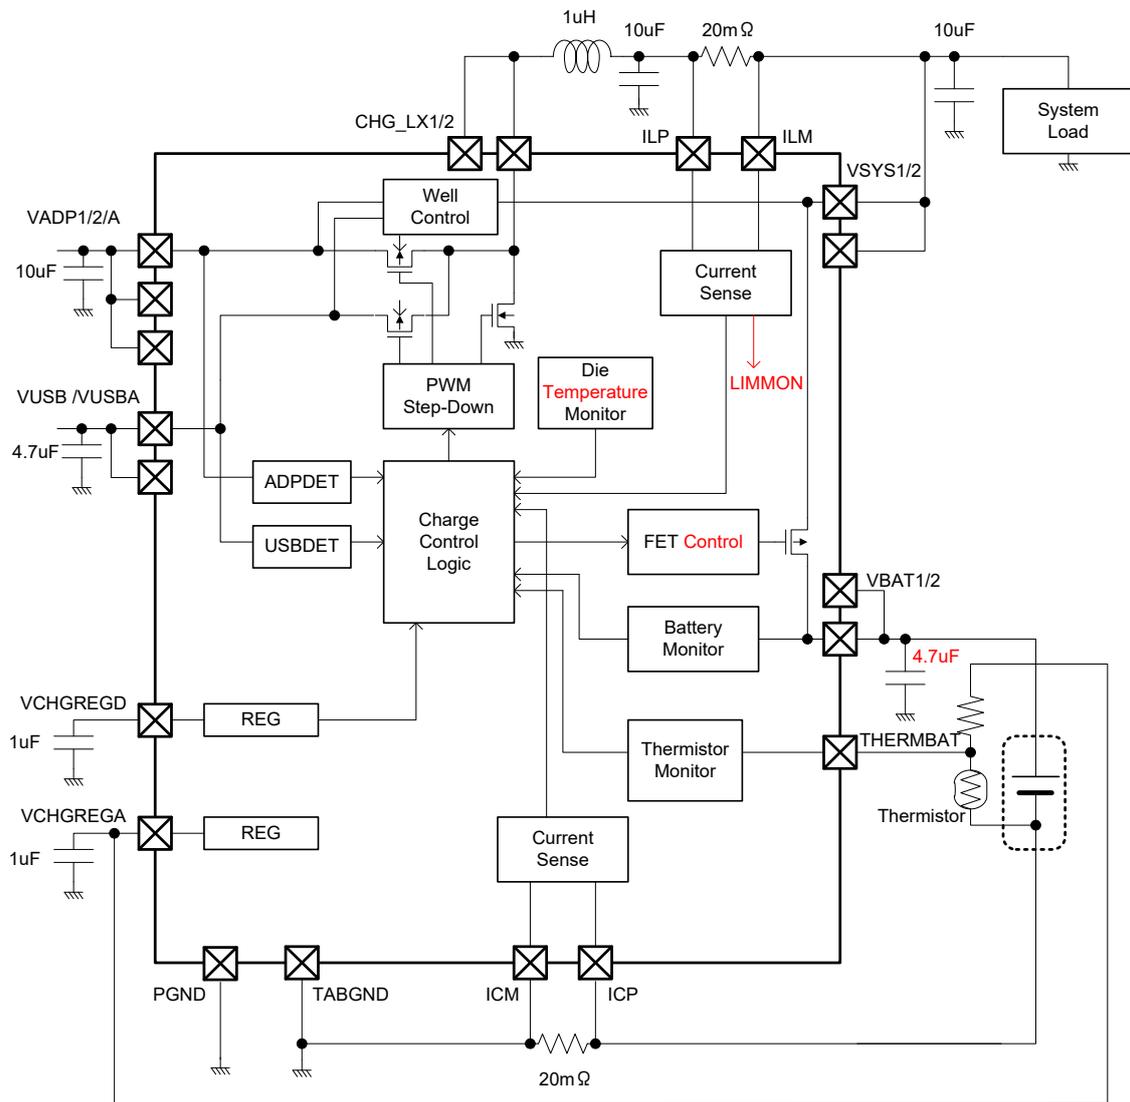

Fig 9-1 Li-ion Battery Charger Block Diagram

## 10. Fuel Gauge

This PMU integrates a Fuel Gauge.

- Battery Fuel Gauge for 1-Series Li-ion applications
- Measure battery voltage and temperature by AD converter (12bit)
- Measure battery current by original coulomb counter include offset cancel circuit
- Calculate remaining battery capacity compensate change that depends on temperature and aging
- Predict remaining battery life at present rate of discharge
- Predict remaining time until battery reaches full charge
- Display battery aging state

### 10.1 Fuel Gauge Block Diagram

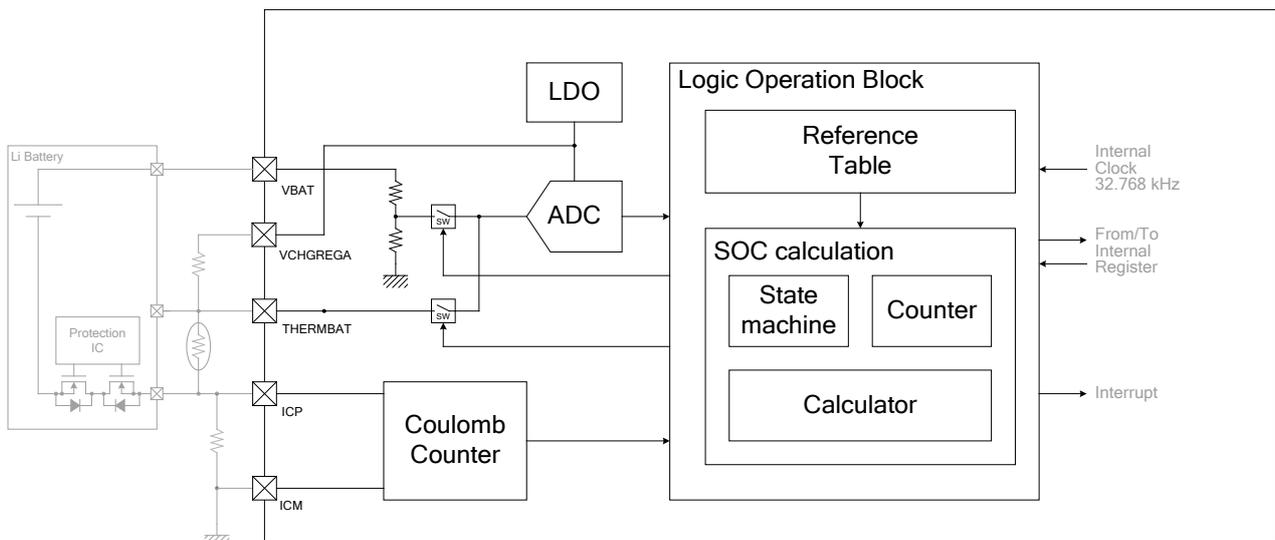

Fig 10-1 Fuel Gauge Block diagram

## 11. ADC

This PMU has 12-bit A/D converter with 8-channel multiplexer.

- The eight inputs are LIMMON, VBAT, VADP, VUSB, VSYS, THERMBAT and two external pins.
- Built in voltage divider (VBAT, VADP, VUSB and VSYS).
- Single-mode / Auto-mode with the average calculation.
- In single-mode, ADC generates the interrupt signal at the end of conversion.
- In auto-mode, the interval of each conversion is programmable.
- In auto-mode, High/Low thresholds for ADC conversion result to generate the interrupt signal.

### 11.1 Block Diagram

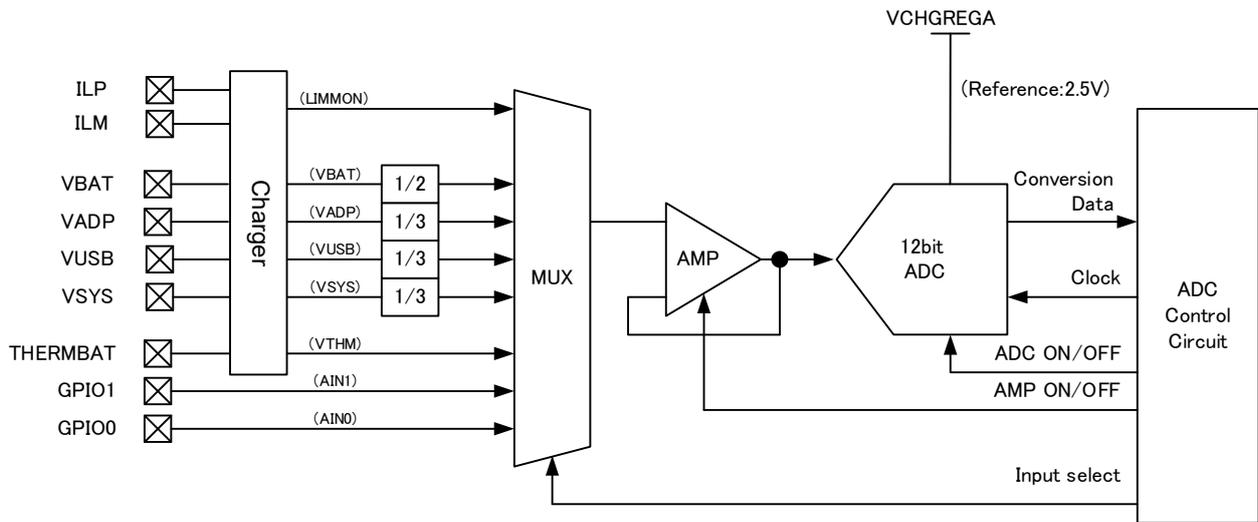

Fig 11-1 ADC Block Diagram

## 12. GPIO

This PMU supports four channels of general purpose input/output.  
GPIO0,1,2,3 pins have the function selected by OTP as shown below.

Name	Function	Input,*1,*2	Output,*1,*2	Power,*3	GPIO			
					0	1	2	3
AIN0	ADC Input	A	-	-	○	-	-	-
AIN1	ADC Input	A	-	-	-	○	-	-
N_OE	External power off	N	-	VSYS	○	○	○	○
GPIO0	General purpose I/O	C or N	C or N	VSYS or VDDIO	○	-	-	-
GPIO1	General purpose I/O	C or N	C or N	VSYS or VDDIO	-	○	-	-
GPIO2	General purpose I/O	C or N	C or N	VSYS	-	-	○	-
GPIO3	General purpose I/O	C or N	C or N	VSYS	-	-	-	○
ONOB	PWRON pin monitor	-	N	VSYS	○	○	○	○
PSO0	Power-on signal output function	-	C or N	VSYS or VDDIO	○	-	-	-
PSO1	Power-on signal output function	-	C or N	VSYS or VDDIO	-	○	-	-
PSO2	Power-on signal output function	-	C or N	VSYS	-	-	○	-
PSO3	Power-on signal output function	-	C or N	VSYS	-	-	-	○
VUSBDET	VUSB voltage detector output	-	N	VSYS	○	○	○	○
VBATDET	VBAT voltage detector output	-	N	VSYS	○	○	○	○
LDORTC2	LDORTC2 output	-	A	-	-	-	○	-
CLK32KIN	32 kHz clock input for Fuel Gauge	C	-	VSYS or VDDIO	○	○	-	-
				VSYS	-	-	○	○
LED	LED function	-	N	VSYS	○	○	-	-
PSHOLD	PSHOLD (power-on hold) function	N	-	VSYS	○	○	○	○
ON_EXTIN	External input for on factor	N	-	VSYS	○	○	○	○
**EXON	External LDO*/DCDC* on/off input	N	-	VSYS	*4	*4	*4	*4

Note\*1: Explanation of column of "Input" and "Output" :

A : Analog Input/Output.

C : CMOS Input/Output.

N : NMOS Input(VSYS only)/ Nch Open Drain Output.

Note\*2: CMOS or Nch is selectable by OTP.

Note\*3: VSYS or VDDIO is selectable by OTP.

Note\*4: Refer to the chapter of Mode.

Table 12-1 The function of GPIO0-3 pins

## **NOTICE**

1. The products and the product specifications described in this Data Sheet are subject to change or discontinuation of production without notice for reasons such as improvement. Therefore, before deciding to use the products, please refer to our sales representatives for the latest information thereon.
2. This Data Sheet may not be copied or otherwise reproduced in whole or in part without prior written consent of our company.
3. Please be sure to take any necessary formalities under relevant laws or regulations before exporting or otherwise taking out of your country the products or the technical information described herein.
4. The technical information described in this Data Sheet shows typical characteristics of and example application circuits for the products. The release of such information is not to be construed as a warranty of or a grant of license under our rights, any third party's intellectual property rights or any other rights.
5. The products listed in this Data Sheet are intended and designed for use as general electronic components in standard applications (office equipment, computer equipment, measuring instruments, consumer electronic products, amusement equipment etc.). Those customers intending to use a product in an application requiring extreme quality and reliability, for example, in a highly specific application where the failure or miss-operation of the product could result in human injury or death (aircraft, space vehicle, nuclear reactor control system, traffic control system, automotive and transportation equipment, combustion equipment, safety devices, life support system etc.) should first contact us.
6. We are making our continuous effort to improve the quality and reliability of our products, but semiconductor products are likely to fail with certain probability. In order prevent any injury to persons or damages to property resulting from such failure, customers should be careful enough to incorporate safety measures in their design, such as redundancy feature, fire-containment feature, and fail-safe feature. We do not assume any liability or responsibility for any loss or damage arising from misuse or inappropriate use of the products.
7. Anti-radiation design is not implemented in the products described in this Data Sheet.
8. Please contact our sales representatives should you have any questions or comments concerning the products or the technical information.

All materials on this document are protected by Japanese copyright laws, and other applicable laws and treaty provisions of countries throughout the world. Except for personal or non-commercial internal use, copying, modifying, reproducing in whole or part, transmitting, distributing, licensing, selling and publishing any of the materials is prohibited without obtaining prior written permission from Nisshinbo Micro Devices Inc.

1. The products and the product specifications described in this document are subject to change or discontinuation of production without notice for reasons such as improvement. Therefore, before deciding to use the products, please refer to our sales representatives for the latest information thereon.
2. The materials in this document may not be copied or otherwise reproduced in whole or in part without prior written consent of our company.
3. Please be sure to take any necessary formalities under relevant laws or regulations before exporting or otherwise taking out of your country the products or the technical information described herein.
4. The technical information described in this document shows typical characteristics of and example application circuits for the products. The release of such information is not to be construed as a warranty of or a grant of license under our company's or any third party's intellectual property rights or any other rights.
5. The products listed in this document are intended and designed for use as general electronic components in standard applications (office equipment, telecommunication equipment, measuring instruments, consumer electronic products, amusement equipment etc.). Those customers intending to use a product in an application requiring extreme quality and reliability, for example, in a highly specific application where the failure or misoperation of the product could result in human injury or death (aircraft, spacevehicle, nuclear reactor control system, traffic control system, automotive and transportation equipment, combustion equipment, safety devices, life support system etc.) should first contact us.
6. We are making our continuous effort to improve the quality and reliability of our products, but semiconductor products are likely to fail with certain probability. In order to prevent any injury to persons or damages to property resulting from such failure, customers should be careful enough to incorporate safety measures in their design, such as redundancy feature, fire containment feature and fail-safe feature. We do not assume any liability or responsibility for any loss or damage arising from misuse or inappropriate use of the products.
7. Anti-radiation design is not implemented in the products described in this document.
8. The X-ray exposure can influence functions and characteristics of the products. Confirm the product functions and characteristics in the evaluation stage.
9. WLCSP products should be used in light shielded environments. The light exposure can influence functions and characteristics of the products under operation or storage.
10. There can be variation in the marking when different AOI (Automated Optical Inspection) equipment is used. In the case of recognizing the marking characteristic with AOI, please contact our sales or our distributor before attempting to use AOI.
11. Please contact our sales representatives should you have any questions or comments concerning the products or the technical information.
